**COMPANY PROFILE**

Tes Transco Private Limited is construction company focusing primarily in construction of EHV Transmission Line Projects. We have been leading the industry for the last 25 years. We have executed numerous transmission lines ranging from 110 KV to 765 KV all over India in diverse terrains like dense forests, submerged areas and hilly terrains.

We provide all types of services in transmission line industry spanning from line survey using most modern technology, civil works, tower erection works and stringing works. With our expertise and competence and wide range of machineries available we address the toughest challenges in transmission line construction and deliver the projects ahead of schedule.

**Our Directors**

**Babu Verampilavil Raphael** Managing Director , Babu has over **26 years'** experience in the Overhead Power line industry. He has managed projects ranging from 110KV up to 765KV during the 25 years tenure.

**Our Esteemed Client's**

**Major Projects**

We have executed major transmission lines projects across India and some of the major projects are as follows

- 1) Upgrading and uprating of 220 KV Single Circuit line to 400 /220 Kv Multi Circuit Multi Voltage Line from Madakkattara to Areekodu (KSEB)
- 2) 220/110 KV MC MV Line of Kannur Lines Package of KSEB Ltd.
- 3) 220/110 KV MC MV Line of Sabari Lines Package of KSEB Ltd.
- 4) 765 KV Double Circuit Chennadi - Satra Transmission Line (PGCIL)
- 5) 765 KV Double Circuit Vindhyachal - Jabalpur Transmission Line (PGCIL)
- 6) 765 KV Double Circuit Dhananjaygd - Jabalpur Transmission Line (PGCIL)
- 7) 765 KV Double Circuit Venagiri - Chalkalakurpa Transmission Line (PGCIL)
- 8) 400 KV Multi Circuit Salsar - Rampura Transmission Line (KPTCL)
- 9) 400 KV Double Circuit Tumber - Betari Transmission Line (KPTCL)
- 10) 400 KV Double Circuit Babeshwar - Kudus Transmission Line (Maharashtra Electricity Board)
- 11) 765 KV KV Double Circuit Solapur - Beed Transmission Line (PGCIL)
- 12) 765 KV Double Circuit Hyderabad - Wardha Transmission Line (PGCIL)
- 13) 400 KV DIC (Quad) Edamoni - Muvattupuzha Transmission Line (PGCIL)
- 14) Existing 66 KV S/C Malappuram - Manjeri Line to 110 KV DIC Line (KSEB)
- 15) 765 KV DIC Hyderabad Kumool Transmission Line
- 16) 800 KV HVDC Rajahm - Pugalur (Part VIII) Transmission Line (PGCIL)
- 17) 400 KV DIC Jukrupadu - Buryapeta Transmission Line
- 18) 400 KV DIC Jukrupadu - KTPS Transmission Line

Building Construction, Designing, Foundation

foundation, Erection, Stringing and Commissioning

**Areas of Expertise**

We are also experts in erecting transmission line towers ranging from 110KV to 765KV using advanced tools and machineries. We have a capacity to erect 100 metric tons a day. Our team comprises of skilled mechanical engineers, supervisors and skilled workers trained to work at height assisted by safety crew to ensure 100% compliance with safety standards and ensure safe working at site. The towers we have erected ranges in weight from 15 MT to 456 mT and height from 28 meters to 148 meters.

We are also proficient in transmission line stringing works from 110KV to 765KV. We have strung more than 5000 circuit kilometres of EHT stringing. We are also experts in stringing of HTLS conductors and OPGW. We have a record of zero LTI in stringing works and execution of work complying to safety norms is our primary objective.

Your Ideal Partner For Energy Solution

**Areas of Expertise**

We are experts in civil foundation works with in house capacity to do 1000 cubic meter of concreting a day. We have all type of excavators and breakers to enable quick excavation even in the hardest terrains to achieve the target in stipulated time. We have expert team comprising of skilled civil engineers, supervisors and trained civil gang when combined with a wide range of advanced machineries we can make any difficult target attainable. We are experts in open cast foundations and pile foundations. We have our expert survey team ensuring proper alignment of structures being installed. Our quality is unparalleled in industry and we have dedicated quality engineers to ensure that works are in adherence to the laid out site field quality plan.

Your Ideal Partner For Construction Solution

**Quality Measures**

25 years' Experience in the Overhead Power lines

**Safety Measures**

25 years' Experience in the Building Construction

**Equipment's**

Building Construction, Designing, Foundation

**Equipment's**

Your Ideal Partner For Construction Solution

**Our Own Machineries**

Building Construction, Designing, Foundation

**Our Own Machineries**

25 years' Experience in the Building Construction

**Details Of Machineries & Tools**

Sl. No	Description	Total Numbers
1	Grader	1
2	Road Roller	2
3	Hitachi (With Breaker) (Excavator) 370	1
4	Hitachi (With Breaker) (Excavator) 220	12
5	Hitachi (With Breaker) (Excavator) 140	10
6	Hitachi (With Breaker) (Excavator) 110	11
7	JCB (With Breaker)	5
8	Self Loading Concrete Mixer (Ajax) (4 CUM)	3
9	Self Loading Concrete Mixer (Ajax) (2.5 CUM)	2
10	Self Loading Concrete Mixer (Ajax) (2 CUM)	3
11	Tipper 600cft	3
12	Tipper 300cft	4
13	Tipper 150cft	4
14	Tipper 100cft	16
15	Lorry	10
16	Tractor with Trolley	6
17	Water Tank	7
18	Bolero Pick UP	10
19	Bolero Vehicle	10
20	TUV Vehicle	2
21	Bus (Mahindra)	2
22	Bus (Tata)	6
23	Steel Cutting Machine	40
24	Water Pump	40
25	Vibrator	40
26	Sheet Piling Tools	
27	Manpower	300
